

Unlimited access to mental health assessments now available within Titanium Schedule®

Every institution of higher education is dealing with a student mental health crisis. To make sure any college student struggling with mental health issues can be identified, Pearson has built the Digital Assessment Library (DAL) for University Student Mental Health, Titanium Edition.

Purchased through Pearson and delivered online through Titanium Schedule, this library of digital assessments has been designed as an affordable, unlimited-use subscription that ensures college counselors and student mental health professionals have access to the highest quality mental health assessments at a flat, worry-free annual cost.

**DIGITAL
ASSESSMENT
LIBRARY**

The Digital Assessment Library features:

- Unlimited access and administrations
- Five standardized mental health assessments (details on back)
- One simple, annual price for use with the entire student population
- Digital administration, scoring, and reporting through Titanium Schedule software

Which digital mental health assessments are included?

Beck Scale for Suicide Ideation® is an evaluation that helps measure a broad spectrum of attitudes and behaviors clinicians routinely consider when assessing a patient's suicide risk.

[Sample report](#)

[Sample progress report](#)

Beck Hopelessness Scale® measures attitudes about the future. It can be administered with the BDI®-2 and BSS® for a complete evaluation.

[Sample report](#)

[Sample progress report](#)

Quality of Life Inventory is a psychological assessment of well-being and satisfaction with life and yields an overall score based on the "Sweet 16" areas that make up quality of life, including love, work and play.

[Sample report](#)

[Sample progress report](#)

Beck Anxiety Inventory® is a brief, criteria-referenced assessment for measuring anxiety severity and level, with patients responding to 21 items rated on a scale from 0 to 3.

[Sample report](#)

[Sample progress report](#)

Beck Depression Inventory®-2 is a brief, criteria-referenced assessment for measuring depression severity. This widely used instrument for detecting depression is more clinically sensitive than ever.
