

# aimswEBPlus Assessment Matrix

aimswEBPlus™ provides benchmarking and progress monitoring for PreK-12 foundational reading and math skills, and more. It also offers the capability to screen for dyslexia and some of the underlying factors that can contribute to social, emotional, and behavioral issues. The flexibility of aimswEBPlus enables your school to quickly identify students who are at-risk, then monitor and report student progress, and predict performance on grade-level expectations — all within one platform!

This guide provides an at-a-glance view of the measures and assessments in each of the aimswEBPlus assessment domains: Early Literacy and Reading, Early Numeracy and Math, Spanish Early Literacy and Reading, Spanish Early Numeracy and Math, and Classic AIMSweb Measures. Also included are optional assessments for Dyslexia and Social/Emotional/Behavioral skills.

The following is a key for the Assessment Matrix.

Measure	Grade Levels & Periods	Progress Monitoring and SLA	Time	Administration Method		
						
The measure or assessment name and acronym	The grade/age levels and screening periods (fall, winter, spring, summer) when benchmarking measures are available, and the grade levels that monitoring measures are available throughout the year	The measure is available for progress monitoring and survey level assessment (SLA)	The average completion time for untimed measures or the time allowed for timed measures	<b>Digital Record Forms (DRF) measure:</b> The measure is administered to students in one-to-one test sessions. Students view printed/digital materials and provide an answer. Examiners mark students' responses on the DRF in their aimswEBPlus account.	<b>TestNav measure:</b> The measure is delivered to students through TestNav, an online test delivery platform. Each student has unique login credentials (username and password) to access assigned measures in the Reading or Math domains. These measures may be group administered.	<b>Paper/Pencil measure:</b> The students write their responses on a printed test form. Examiners hand score the responses and enter the results into the aimswEBPlus system. These measures may be group administered.
